

YASINTHA LAKSHAN DE ZOYSA AGAMPODI

Edgware, London | yasinthalakshan06@gmail.com
github.com/yasynthia06 | linkedin.com/in/yasynthia-agampodi-a416a1325

PROFILE

First Class BSc (Hons) Computing Systems result from Ulster University, now building a career in cloud computing. Hands-on experience across cloud, full-stack development, embedded systems and network security, including a cloud-native platform on Microsoft Azure. Strong problem-solving and communication skills from an electrical apprenticeship and customer-facing work. Seeking an entry-level IT, cloud support or junior cloud engineer role.

EDUCATION

BSc (Hons) Computing Systems — First Class Honours

Jan 2024 – Sep 2026

Ulster University, London Campus · Completed, awaiting graduation

GCE Advanced Level — Physical Science Stream

2022

Pure Mathematics (C) · Chemistry (C) · Physics (C)

TECHNICAL SKILLS

Cloud & DevOps: Microsoft Azure (App Service, Cosmos DB, Blob Storage, Application Insights), MongoDB Atlas, GitHub Actions

Languages & frameworks: Python, TypeScript, SQL, Node.js/Express, Flask, Angular

Databases: MongoDB / MongoDB Atlas, SQLite, Azure Cosmos DB

Security & networking: Intrusion detection, network traffic analysis, JWT/OAuth authentication

Embedded & AI: Arduino, Raspberry Pi, Edge Impulse (TinyML)

Tools: Git/GitHub, Chart.js, Compodoc

KEY PROJECTS

Zeilan Paradise — B2B Tourism Platform (live)

zeilanparadise.com

- Designed, built and launched a live B2B inbound tourism website for Sri Lanka.
- Full-stack build with Python (Flask) backend APIs and a responsive Angular frontend.
- MongoDB Atlas data layer; hosted on Azure App Service with GitHub Actions CI/CD.

PixelShare — Cloud-Native Photo Sharing Platform (Azure)

github.com/yasynthia06/PixelShare

- Built a full CRUD REST API with Node.js/Express for uploading, browsing, updating and deleting images, deployed to Azure App Service via GitHub Actions.
- Stored metadata in Azure Cosmos DB and image files in Azure Blob Storage, handling base64-encoded uploads server-side.
- Added Azure Application Insights for live telemetry and monitoring across the upload and retrieval pipeline.

DevHire — Full-Stack Applicant Tracking System

github.com/yasynthia06/DevHire

- Built a recruitment platform with Angular 21, Flask and MongoDB, covering the full journey from job listing to hire.
- Added hybrid login (local JWT plus Google/Auth0 sign-in) and a role-based admin hub with real-time applicant status tracking.
- Verified with 36 passing unit tests and full Compodoc architecture documentation.

Lightweight Network Security Monitor (LNSM) — Final-year project

github.com/yasynthia06/LNSM

- Built a real-time intrusion detection system capturing TCP/UDP/ICMP traffic, with a Flask REST API and SQLite (WAL mode) for high-throughput logging.
- Detected brute-force attempts, port scans, ICMP flooding and data exfiltration, with live threat geolocation and one-click OS-level firewall blocking.
- Delivered a real-time Chart.js dashboard with CSV export, alerting and IP whitelisting.

PropGuard — Embedded TinyML Vibration Detector for UAVs

- Designed a drone pre-flight fault detector using an Arduino Nano and GY-521 accelerometer, classifying abnormal vibration on-device in under 100 ms.
- Built a relay-based take-off interlock that blocks flight when a fault is found, demonstrated on a bench motor rig.
- Trained the model on self-collected motor vibration data, cross-checked against a published UAV vibration dataset.

WORK EXPERIENCE

Zeilan Paradise — Founder & Lead Developer

Sep 2026 – Present

London, UK / Sri Lanka

- Founded and run a B2B inbound tourism business for Sri Lanka, and designed and built its website, zeilanparadise.com (see Key Projects).
- Co-founded a B2B garment manufacturing partnership in Sri Lanka, managing operations, workshop setup and digital presence.

Electrical Apprentice

Jan 2024 – Present

- Assist with installing, maintaining and testing electrical systems under supervision, alongside my degree.
- Apply wiring standards, circuit knowledge and safety procedures on site — skills that feed directly into embedded hardware work.

Customer Assistant — Sam's Chicken Ltd

Sep 2024 – Present

- Deliver fast, friendly service in a busy food outlet, handling orders, payments and queries accurately.
- Work as part of a team to keep operations running smoothly at peak times, building communication skills under pressure.
